

### **Workshop 3:**

#### **Introduction to the Clean Water Act for Watershed Stakeholders**

Location: Georgia Center for Continuing Education (Room Q), University of Georgia

Date: Wednesday, April 27, 2005, 8:30 a.m. - 5:00 p.m.

*Instructors: Marjan Peltier, US Environmental Protection Agency, Region IV*

<http://www.epa.gov/region4>

The purpose of this one-day workshop is to provide a broad, but sound understanding of the key components of the Clean Water Act, and how they work together. As we move toward a comprehensive watershed approach to management of water resources, it becomes increasingly important for stakeholders to understand the Act and recognize the most constructive points of involvement. Armed with a firm grounding in the overall structure of the CWA, and basic understanding of the key components, attendees should be able to answer most basic questions about regulatory tools, funding mechanisms and other key elements of the CWA.
